COUNTING ROBOT 1-10

I hope you enjoy this counting robot. Choose from the different robots and numbered spinning wheels. You can also create your own robot without the counting wheel by using the blank robot and robot parts templates.

Print the robot on white or coloured paper. I suggest using thin cardboard for best results.

After cutting out the pieces, make sure to attach the number spinner to the back of the robot body and secure with a split pin. Glue the arms and legs to the body or, again, use split pins to make them moveable.
