

10 WAYS KIDS CAN HELP SAVE THE PLANET

1. Reduce, Reuse, Recycle:

Learn to recycle paper, plastic, glass, and metal. Try to reuse things instead of throwing them away and use less plastic.

2. Save Energy:

Remember to turn off lights, TVs, and computers when not using them. Use energy-saving light bulbs and appliances.

3. Conserve Water:

Use less water by turning off the tap when brushing teeth and taking shorter showers. Fix leaks and collect rainwater for plants.

4. Plant Trees:

Help plant trees to keep the air clean and give animals homes.

5. Support Wildlife:

Learn about local animals and how to help them. Keep areas clean and don't litter.

6. Choose Eco-Friendly Products:

Pick things that are good for the environment, like items made from recycled materials.

7. Eat Sustainably:

Eat more fruits and vegetables, support local farmers, and don't waste food.

8. Clean up Rubbish:

Join clean-up events to keep parks, beaches, and streets clean. Throw rubbish in the right place.

9. Reduce Pollution:

Walk, bike, or take the bus instead of always using cars. Plant trees to help clean the air.

10. Teach Others:

Share what you know about helping the environment with friends and family. Start a club at school to do more together.
